Thanks Roger,

This is the first I have seen of this – do we have a deadline? At a minimum, we will figure out the proper response to staffing/funding of BDCP review – at least the regional numbers.

Subject: QFRs on BDCP and Drought

R9 Friends,

There are several Questions for the Record (QFRs) that pertain to our joint work on the BDCP and on drought. I am not sure if they have made their way out to you all.

I am pretty sure the 1st McNerney question you have seen.

Do you want me to take a first crack at an answer to these? I have already mentioned to those collecting the responses that the answer to some of these may change over the coming week(s) or month(s).

Here they are:

The Honorable Jerry McNerney Roger Gorke Response (Referenced from pg. 11)

“1. How many staff and how much funding has EPA designated for review of the Bay Delta Conservation Plan?”

2. Does EPA currently have a strategic plan for assessing and managing the risks of drought to drinking water

provided by public water systems?

a. If no, would creating a strategic plan be beneficial for use by other federal, state, and local entities?
